

# outtallectuals

Outtallectuals is a music label and live act, established in the United Kingdom in 2011 and is now comprised of a large network of +40 international artists, with focus on roots-based and future-thinking organic bass music and emphasis on cutting-edge beat-making, textural field recordings, world instruments.

We have had more than 30 releases as a record label, as well as curating fundraiser projects to carry out sustainable development work. Starting with involvement in TEDxBathUniversity 2012, we have since accelerated our philanthropic projects by curating fundraiser compilations and using the funds to aid the post-Earthquake rebuilding process in a rural part of Nepal, and more recently, renovate Nepal's only existing skatepark.

Catering to the occasion, all our live sets are customized for each show, ranging from slow ambient to fast heavy, and DJ sets to live band performances. At the core, the sets are based around Baxtak's DJ sets made up of releases made by Outtallectuals artists and other carefully chosen picks. The live experience can also be expanded to feature Outta producer, Mettakin, reggae MC/singer Cultivation, multi-instrumentalist, SIKADA, and other collaborating label or guest musicians.

## Live Gig Highlights (click through for more info)
